AUTHOR Gaylord, Thomas; And Others
TITLE Fact Book 1991, University of Alaska Fairbanks.
INSTITUTION Alaska Univ., Fairbanks.
PUB DATE Apr 91
NOTE 249p.
AVAILABLE FROM University of Alaska Fairbanks, 201 Eielson Building, Fairbanks, AK 99775-0885.
PUB TYPE Statistical Data (110) -- Reports - Research/Technical (143)

EDRS PRICE MF01/PC10 Plus Postage.
DESCRIPTORS *Budgeting; *College Faculty; *Degrees (Academic); *Enrollment Trends; *Facilities; *Financial Support; Full Time Faculty; Higher Education; Public Service; Research; Statistical Data; Student Characteristics; Teacher Student Ratio; Tuition
IDENTIFIERS *University of Alaska Fairbanks

ABSTRACT

This fact book contains detailed student, faculty, academic, and financial information about the University of Alaska, Fairbanks. The book is divided into seven sections: (1) general information; (2) academic information; (3) student information; (4) faculty and staff information; (5) budget and financial information; (6) research and public service information; and (7) facilities information. Over 75% of the fact book is comprised of statistical data, tables, and charts. Among the information provided are various statistical breakdowns of the fall student enrollment population; various statistical evaluations of the full-time faculty and staff population; student and faculty ratios; trend information on academic degrees conferred, by type and from what departments and programs; and research and public service expenditures, funding, and usage statistics. Also included are facilities data such as building inventory, space allocation, and classroom enrollment statistics. (GLR)

Dedication
to Chancellor Patrick J. O'Rourke

Dr. Patrick J. O'Rourke became Chancellor of the University of Alaska Fairbanks in August 1981. During the past 10 years, he has been the person most responsible for the direction, growth and maturation of this, the oldest institution in the University of Alaska system, and the state's only land-grant, sea-grant, and most recently, space-grant institution.

Thanks to his efforts, the University of Alaska Fairbanks expanded its international ties and exchange programs with the Northern Pacific Rim, reaffirmed its commitment to Alaska's Native American Students, revamped the core curriculum, developed a campus master plan, demonstrated a commitment to the Art in Public Places Program, developed effective research and teaching incentives for faculty, and encouraged a number of honors programs to attract and retain excellent students. Under his leadership, our research efforts have expanded in scope and import and additional multidisciplinary centers have been established. He has continued to reinforce the tripartite nature of the professoriate and brought about a balance between teaching, scholarship and service.

Now, as Chancellor Patrick J. O'Rourke retires from the University of Alaska Fairbanks, we wish to publicly acknowledge his outstanding leadership. We also wish to express our appreciation to him for his 21 years of contributions to higher education in Alaska, and, therefore, dedicate this first Fact Book on the history of our institution to him as a permanent record of the gratitude of the entire University of Alaska Fairbanks community.

Preface and Acknowledgments

We are proud to present the first annual *Fact Book 1991*, which records a wealth of important information about the University of Alaska Fairbanks.

We are confident that administration, faculty, staff, students, alumni and friends of the university will find this publication a convenient, authoritative, and valuable reference of general and statistical information about UAF. Suggestions for future editions are welcomed and encouraged.

Our sincere appreciation is extended to many individuals throughout the UAF community and the State who contributed to the production of this *Fact Book:* Chancellor Patrick O'Rourke, Linda Schon, Janice Reynolds, Luis Proenza, Jerome Trojan, Harris Shelton, Les Reidlinger, Walter Ensign, James Stricks, Charles Graham, Ann Tremarello, Althea St. Martin, Jeff Yauney, Richard Machida, Steve Brown, Tom Frank, Tim Bauer, Tom Healy, Jo Knox, Jr., Michelle Wood, John Dickinson, Marnie Cornwall, Matt Jones, Paul McCarthy, Terry Dickey, Mark Tumeo, Jane Maynard, David Leone, Russ Newell, Betty Hoch, Lorna Merz, Howard Harrell, Michael Rice, Clif Lando, Paul Reichardt, Gerald Mohatt, James Drew, Vera Alexander, Pat Book, Vincent Haneman, Russ Ostermann, and John Wasileski (Arizona State University).

A special thank you is extended to the Office of University Relations for contributing greatly to the overall style and design of the actual publication.

Lastly, I want to thank Brian Youngberg, Charlotte Morgan, Jennifer Burchfield, and Jayne Harvie. Through their efforts the vision of a UAF statistical almanac became a reality. The long nights and weekends spent working and reworking data, formatting tables, and distilling information to get to that one critical graphic couldn't have been spent with a more energetic and competent team. As is usually the case, building underlying management information systems from the ground up requires extraordinary efforts; efforts that make unusual demands on staff. Yet when successfully completed, these efforts yield unanticipated benefits to the institution. You can be proud of your work, it was well done.

Thomas A. Gaylord,
Associate Vice Chancellor

A Basis in Law

The University of Alaska is a constitutionally established state university. The pertinent sections of the Alaska Constitution are cited here.

ARTICLE VII
HEALTH, EDUCATION AND WELFARE

SECTION 2

The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

SECTION 3

The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the Legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

Institutional Mission

The University of Alaska Fairbanks was created by the U.S. Congress in 1915 and accepted by the Territorial Legislature in 1917 as the Alaska Agricultural College and School of Mines. Today, as a comprehensive land-grant, sea-grant, and most recently, space-grant university, the multi-campus University of Alaska Fairbanks exists as a vital state resource to teach, to inquire and to serve.

The University of Alaska Fairbanks offers instructional programs covering a broad postsecondary spectrum and is the major research center for Alaska. The University is committed to providing a free and open forum where ideas and issues may be professionally pursued and frankly debated in an environment of mutual respect and intellectual integrity. It seeks to provide an intellectually stimulating learning process which is culturally sensitive and empowering to its students. The University is committed to assuring that its graduates receive a balanced education in the arts, humanities, natural and social sciences through which creativity is fostered and historical and philosophic perspectives are gained. As a result, the state benefits from an educated citizenry capable of the independent pursuit of further learning, of contributing to the economic well-being of the state and nation and of participating in and contributing to global society. The University seeks a culturally diverse environment that values and promotes equal treatment of sexes, races and cultural and ethnic groups throughout its academic programs, student body, faculty and staff.

The University of Alaska Fairbanks as a residential institution of higher education serves students from all of Alaska as well as from other states and nations. It is particularly committed to enhancing educational opportunities for Alaska's rural and native populations. Through its branch campuses in Bethel, Kotzebue, Nome, Bristol Bay and the Interior and its rural education centers, the University is responsive to local and regional needs, including open educational access to it programs. Special strengths exist in the use of educational technology which provides for the distance delivery of selected programs to many areas of the state. In seeking to serve a broad array of students, admission to several associate degree and certificate programs is open to all. Admission requirements to all baccalaureate and graduate programs as well as some Associate of Applied Science degree programs vary depending on the specific field of study.

Institutional Mission continued

The University of Alaska Fairbanks offers developmental programs and certificate, associate, baccalaureate and graduate/professional programs in the arts, sciences, career fields and professions. It is a center for graduate education and is Alaska's only doctoral granting institution. It possesses unique strengths in the physical and natural sciences and offers a broad array of engineering programs with a particular emphasis on the stresses of northern environments. UAF is a major center for the study of natural resources including minerals, forestry, wildlife, geology, agriculture, fisheries and ocean sciences and their associated economics. It has been recognized for its work in multi-cultural understanding, rural health problems, and cross-cultural interaction in the human service professions.

As a major center for research and scholarship, the University of Alaska Fairbanks is committed to the mutual enhancement of teaching, research and creative activity, and public service. Scholarship, which produces new knowledge instills a vigor into teaching which in turn stimulates inquiry and the quest for further answers to the unknown. The University seeks to use its particular location in the North as a natural laboratory for the study of questions and issues, whose solutions are not only applicable to Alaskan problems but to the broader understanding of our global community. As part of a network of state research universities, this institution has an active program of basic and applied research resulting in a well-earned national and international reputation. Specific recognition has been achieved in space physics, marine science, and high latitude biology, environmental sciences, engineering and geophysics. The University has recognized programs in definition, exploration, development and management of Alaska's renewable and nonrenewable resources. It is the state's center for study of Alaska Native cultures and languages.

Through its Cooperative Extension Service and Marine Advisory Program, research results are interpreted and transferred to the people of the state. Its continuing education programs extend the expertise of the university to adult learners needing alternative learning opportunities. The University's library and museum provide the state's major information resources and cultural collections with a particular strength in Alaska and polar regions. Finally, through its programs in fine and performing arts, the University provides cultural enrichment to the state's interior and rural populations. In accomplishing this mission, the University seeks the advice and guidance of Alaska's residents and friends.

UAF Statewide Outreach

Historical Highlights

The University was originally established by the United States Congress as a land-grant college, called the Alaska Agricultural College and School of Mines.

1915 The location of the University was selected in 1915 by one of the early founders of Fairbanks, James Wickersham. At that time, Anchorage was only a young tent city, and Juneau, being a center of population and government, had little interest in an agricultural college. The cornerstone laying ceremony was held on the Fourth of July, 1915.

1917 Governor Strong signs the bill May 3, 1917 accepting the federal land grant of 2,250 acres to create the Alaska Agricultural College and School of Mines as a land-grant college. A separate corporate is established which provides for a board of trustees.

Bunnell Dr. Charles E. Bunnell became the founding president in 1921. He was a judge of the U.S. District Court in Fairbanks for the preceding seven years (a position he assumed after Wickersham defeated him in 1914 for a position as delegate to Congress). Bunnell was appointed by the Board of Trustees (which became the Board of Regents in 1935). His long-time political rival, Wickersham, tried to have the board rescind his appointment.

1922 The "Farthest North College," as it was commonly referred to in its early years, opened on September 18, 1922 with six faculty and six students, in addition to President Bunnell and his secretary. The total student body rose to 12 after late enrollments. The first annual Commencement Exercises were held in 1923. President Warren Harding also visited the campus that year.

The Bureau of Mines station was transferred to the College in 1924. Other developments included the establishment of the U.S. Bureau of Biology Survey Station in 1926, the organization of the Business Administration Club in 1927, and the formation of the Civil Engineering Society in 1929. The first Bunnell-Geist Expedition to St. Lawrence Island occurred in 1927. The College received an appropriation from the Rockefeller Foundation in 1929 to study the aurora borealis.

Historical Highlights continued

The Fairbanks Agricultural Experiment Station was transferred to the College by an act of Congress in 1931. The Matanuska Agricultural Experiment Station was transferred to the College the following year.

Signers' Hall was built in 1931 to be the campus gymnasium. Later it would serve as the library, then the museum. Currently, Signers' Hall is the UAF administration building.

1935

In 1935 the Territorial Legislature approved a name change on July 1, and the Alaska Agricultural College and School of Mines became the University of Alaska. Enrollment was up to 150 with 18 faculty members. Dr. and Mrs. Froelich Rainey built the Rainey/Skarland cabin in 1936.

The Geophysical Institute was created in 1946 by an act of Congress. The College of Magnetic and Seismological Observatory was built in 1947, and the first summer session was held the same year.

World War II

Wartime enrollment was 67 in 1943-44, but increased to 373 in 1946-47.

1949
President Moore

Dr. Terris Moore served as the second president of the University from July 1949 to October 30, 1953. The Chapman Building (the original Geophysical Institute) was completed, as well as Nerland Hall and the Brooks Building. Eielson Building construction, started in 1934, was finally completed in 1950. Enrollment reached 409 in 1953, and courses were offered on several military bases in the State.

President Patty

Dr. Ernest N. Patty, a faculty member in 1922, and Dean of the College from 1925-35, returned as the University's third president in 1953. Construction continued with the expansion of the physical plant, and completion of three more dormitories and two married-student apartment buildings. The Bunnell Building was constructed, and Constitution Hall was completed in time to accommodate the Alaska Constitutional Convention in November 1955. Enrollment rose to 978, and community colleges were established in Anchorage, Ketchikan, and Juneau. The first Ph.D. was conferred at the annual Commencement Exercises in 1957.

Historical Highlights continued

President Wood

Dr. William R. Wood became the fourth president in 1960, guiding the University through its first year of Alaska statehood. The next 13 years saw greater funding for university operations and physical plant development, along with a broadening of academic, research, and public service programs. In 1964, three regions were established—Northern, Southeastern and Southcentral—each with a provost to coordinate and direct activities. Community colleges were organized at Palmer, Sitka, Kodiak, Bethel and the Kenai Peninsula. Regional centers were established at Anchorage and Juneau, augmenting community college programs with upper-division and graduate studies. The Fairbanks campus gained, in addition to a new residence hall complex, gymnasium, classroom buildings (Charles E. Bunnell Building in 1960, William E. Duckering Building, 1964, Ernest Gruening Building, 1972), a heating and power plant, a library/fine arts complex (1969), and campus activity center (Ernest N. Patty Center,1963), further expansion of research facilities on the West Ridge. The Alaska Water Laboratory and the new Geophysical Institute were among new facilities on the West Ridge. The Institute of Marine Science was established by the Alaska Legislature in 1960, the Mineral Industry Research Laboratory in 1963, as well as the Institute of Arctic Biology.

After 1968, university construction expanded from the Fairbanks campus to Anchorage and Juneau. Student enrollment in Fairbanks reached 3,158 in the fall of 1972. Overall enrollment statewide rose from 1,630 in 1960 to 10,325 in 1972, increasing at an average annual rate of close to 17 percent.

President Hiatt

Dr. Robert W. Hiatt succeeded President Wood in 1973. The University of Alaska Foundation was established, encouraging private giving to the University. The Alaska Native Land Claims Settlement Act passed in 1971. With the development of village and regional Native corporations, the need for greater educational opportunities in rural areas of the state developed. In response to this, the university administration and Native leaders conferred to determine the best way to meet critical needs. In 1975, President Hiatt instituted a sweeping reorganization of the university, allowing considerable development of higher education programs in rural Alaska. The position of vice president for rural educational affairs was created. The regional system was abandoned to better emphasize development of the major urban centers in Fairbanks, Anchorage and Juneau. A Chancellor was appointed at each campus with responsibility for all research and academic programs. The

Historical Highlights continued

positions of vice president for research and vice president for academic and faculty affairs were abolished, and the six existing colleges and seven research institutes at UAF were merged into two colleges - Environmental Sciences, and Arts and Sciences-and the Division of Professional Schools. Statewide administration and the Office of the President remained in Fairbanks.

1974

Tanana Valley Community College was established in Fairbanks. A learning center was opened in Barrow in 1974, followed by the Northwest Community College at Nome in 1975.

Chancellor Cutler

Dr. Howard Cutler was appointed Chancellor of the University of Alaska Fairbanks in 1975. Program expansion included petroleum engineering, computer technology and resource management. In 1980, the University became a sea-grant college in addition to its land-grant status. The University of Alaska Museum was relocated to the Otto Geist Building on West Ridge in 1980.

Chancellor O'Rourke

In 1981, Dr. Patrick J. O'Rourke, previously chancellor of the Community Colleges, Rural Education and Extension division, became the Chancellor of the University of Alaska Fairbanks. Enrollment at UAF tops 5,000 for the first time.

Program expansion included a new Northern Studies program and doctoral degrees in mathematics, fisheries and biochemistry. The College of Human and Rural Development was created in 1982.

Constitution Park was completed in 1982 to honor the Alaska delegates that drafted and signed the Alaska State Constitution. The park is located between Constitution Hall, the Fine Arts Complex and the Gruening Building. The Student Apartment Complex was completed in 1984.

Restructuring

In 1987 President Donald O'Dowd restructured the University of Alaska System. UAF assumes additional rural responsibilities with campuses in Bethel, Nome, Kotzebue, Bristol Bay and the Interior.

Historical Highlights continued

In September 1990 Chancellor O'Rourke announced his decision to step down as chancellor at the end of June1991.

1991

In February of 1991, the University of Alaska Fairbanks was designated a Space-Grant Institution by the National Aeronautics and Space Administration (NASA). This grant was in recognition of UAF's nationally competitive aerospace research and educational programs.

Presidents/Chancellors of the Institution

1921 The board of trustees selects Dr. Charles E. Bunnell, judge of the U.S. District Court at Fairbanks, as the college's first president. Bunnell assumes the postion on December 7.

1949 Dr. Terris Moore, a former president and trustee of the Boston Mu seum of Science, assumes the presidency on July 1.

1953 Moore steps down as the second president and is succeeded by Dr. Ernest Patty, a member of the original faculty in 1922 and dean from 1925-35.

1960 Dr. William R. Wood, former academic vice president and acting president of the University of Nevada, succeeds Patty as president of the University, one year after Alaska gains statehood.

1973 Dr. Robert W. Hiatt succeeds Wood as the University's fifth president. Hiatt reorganizes the University in 1975, ending the regional system, and appoints chancellors to head the Fairbanks and Anchorage units.

1976 Dr. Howard A. Cutler assumes his duties as the first chancellor of the University of Alaska, Fairbanks.

1981 Dr. Patrick J. O'Rourke succeeds Cutler as UAF's second chancellor.

International Agreements

Country	Institution	Date Signed
Australia	Western Australia School of Mines	Oct. 1984
Canada	McGill University	Sept. 1987
Denmark	Danish Writers Union, Danish Arts Council	Mar. 1989
	University of Aarhus	Oct. 1984
	University of Copenhagen	June 1986
Finland	Technical Research Center (VIT)	Oct. 1984

Faculty National/International Appointments

Dr. David Hopkins received the Fryxell Award from the Society of American Archaeology recognizing his contributions. This is the most prestigious national award given by the SAA and only the most distinguished senior scholars are considered.

Nicole Hallingstad, a UAF history graduate, was named a center fellow by the Center for the Study of the Presidency.

Dr. F. H. Fay of the Institute of Marine Science was appointed by President Reagan to the Marine Mammal Commission.

Dr. Wilford Weeks was recognized by the International Glaciological Society for his outstanding contributions and was awarded the society's highest honor, the Seligman Crystal.

A three-person team of UAF undergraduate math students were first in the nation and won "outstanding" status for their solution to a problem during the prestigious National Competition in Mathematical Modeling in February, 1990. Their paper will be published by the UMAP Journal and they were invited to present their solution to both the Operations Research Society of America's national meeting in Las Vegas and the Mathematical Association of America's annual meeting. A second UAF team scored honorable mention.

Steve Hemshrot of the College of Natural Sciences received a distinguished service award from the National Association of County Agricultural Agents.

Sara Elder and Leonard Kamerling received first place at the American Film Festival and the Grand Prize at the International Film Festival in Italy for their documentary film, "Drums of Winter."

Dr. Vera Alexander has been elected a Fellow by the Council of the American Association for the Advancement of Science. She also serves on the National Academy of Sciences Polar Oceans Panel and the Arctic Marine Science Committee as Chairman of the Polar Research Board

Faculty National/International Appointments continued

Dr. Thomas C. Royer of the Institute of Marine Science has served on the National Research Council, Associateship Review Panel, since 1984.

Dr. Juan G. Roederer was appointed by President Ronald Reagan to serve on the National Arctic Research Commission which he now chairs.

Dr. Gunter E. Weller of the Geophysical Institute has been a member of the Polar Oceans Climate Studies Panel, Board of Ocean Science and Policy, National Research Council, since 1984. He also serves on the Geophysics Research Forum, National Academy of Sciences.

Dr. Carl S. Benson, professor emeritus, was elected a fellow of the American Association for the Advancement of Science.

NOTES: (1) Student FTE is a hypothetical student who enrolls in 15 undergraduate or 12 graduate credit hours per semester. The student FTEs in this table are course-based, not student-level based, indicators of productivity.

(2) Faculty FTE is, for non-thesis/research/practicum/individual study/intern courses, equal to the number of fall semester undergraduate course credit hours taught divided by 12 and the number of graduate credit hours divided by 9. For thesis/research/practicum/individual study/intern undergraduate courses and courses with less than three students, equals student credit hours divided by (5 x 12); for similar type graduate courses, equals student credit hours divided by (3 x 9). No Faculty was equated to more than 1.00 faculty FTE.

(3) Student Faculty Ratio is the student FTEs divided by the faculty FTEs.

NOTES: (1) A program with an 'X' indicates the program has been or is scheduled to be deleted; an 'S' indicates a temporary suspension of the program.
(2) A dash in the AWARDS field indicates the program was not offered that year.
(3) Currently offered programs are shaded if a) they are 10+ years old, b) since FY85, Masters and below have yielded less than 5 awards, doctoral less than 2 awards.
(4) AVG SCH cells are shaded if SCH is: a) +50 for Certificate or Masters, b) +75 for Associates, or c) +155 for bachelors (UAF SCH only, excludes transfer SCH).
(5) AVG AID includes all UAF student loan aid received, scholarships, grants, and work study (excludes graduate assistantships, waivers, PT UAF employment).

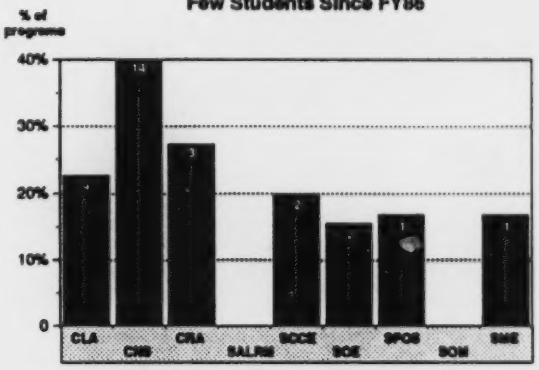
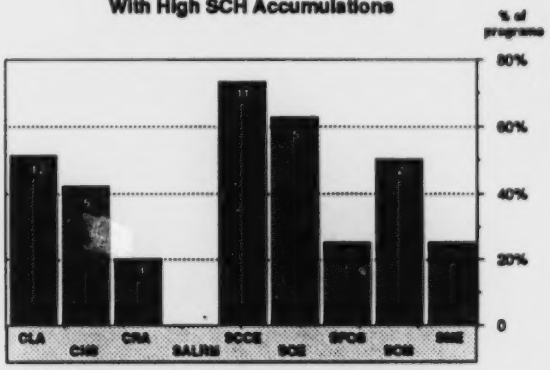
Programs Graduating Few Students Since FY86



NOTE: 1) the program is at least ten years old; 2) the program is not interdisciplinary; 3) the program is not being phased out or suspended; 4) for masters level and below, the program has yielded less than five graduates in the last last five years; and 5) for doctoral programs, the program has yielded less than two graduates in the last last five years

Programs Yielding Graduates With High SCH Accumulations



NOTE: 1) the program is below the doctoral level; 2) the program had at least two graduates in FY90; 3) the program is not being phased out or suspended; 4) for Certificate or Masters degree programs, an average of over 50 student credit hours were accumulated; 5) for Associate degree programs, an average of over 75 student credit hours were accumulated; and 6) for Bachelors degree programs, an average of over 155 student credit hours were accumulated.

NOTE: (1) For UAF Total, percents in the column labeled "% FTE of College Total" are course level FTEs divided by total UAF FTEs.
(2) A department is shaded if it has a five-year trend of declining FTE production (a negative slope).
(3) In the column, "Dept FTEs earned by the Dept's Majors", a cell is shaded if its percentage lies outside the range 25% to 70

NOTES: (1) Students enroll in Correspondence Study courses at any time and have up to one year to complete them. FY90 enrollees then, are not necessarily the same students as the FY90 completers tabulated above.
(2) Course subject was not offered in FY90.
(3) Presently, only semester-based Correspondence Study headcount and credits hours are included in Table 3.7.

Source: UAF Correspondence Study Program.

NOTES: (1) In the columns labeled "All Groups", an employee category row is shaded if the total number of employees is 10 or more and the percent that are female is less than or equal to 20 %, or greater than or equal to 80 %.
(2) The last column, "% Minority", is the ratio of the number of resident non-white employees divided by the number of resident employees. An employee EEO category with 20 or more employees is shaded if its minority percentage lies outside the range 10 % to 40 %.
(3) Some department designations / breakouts for employees (in SCCE, SOE, CRA, SME, and some institutes) do not match the actual organizational structure. Academic information has been poorly maintained on the HRS system and also does not reflect current UAF policies regarding faculty. This situation necessitated extensive manual data manipulation prior to the creation of the tables in this section. Although problems remain, reporting accuracy has improved. These data supersede any previous FY90 UAF employee reports.

#1 RESIDENT STUDENT SOURCE. High school graduates per 1,000 population. This is the primary source of entering freshmen at public institutions in the state and is therefore the best single starting base for deriving total enrollments. The state's primary higher education responsibility is to provide post-secondary educational opportunities to its own resident high school graduates.

#2 PARTICIPATION RATIO. Annual full-time equivalent enrollment in public institutions of higher education per high school graduate. This ratio measures the degree to which a state provides attractive and accessible opportunities for higher education to both in-state and out-of-state students relative to the size of its resident student source. High ratios indicate states heavily in the "business" of higher education compared to their basic responsibility to high school graduates.

#3 TAX CAPACITY. The potential of state and local governments to obtain revenues for public purposes through various kinds of taxes. Measured by a "representative tax system" that defines the tax capacity of a state and its local governments as the amount of revenue they could raise if all 50 state-local systems applied identical tax rates (national averages) to their respective tax bases. Adjustment by the COG index establishes equivalent state purchasing power.

#4 TAX EFFORT. State and local tax revenue collected as a percentage of state and local tax capacity. Tax effort measures, as a percentage, how much of the state and local government tax capacity is actually used. The tax revenue collected for all states equals total tax capacity nationwide, so that the national effort, by definition, is 100 percent. Effort measures for the individual states indicate how they compare with the national average.

#5 ALLOCATION TO PUBLIC HIGHER EDUCATION. State and local tax revenue appropriated or levied for current operating educational expenses of public institutions. This ratio suggests the relative importance and requirements of financing public student education to the funding of other public services in the state and local government budgets. The ratio for total appropriations is shown in ( ).

#6 TUITION FACTOR. Student tuition revenues as a percent of total revenues from state and loval government education appropriations plus student tuition revenue. This ratio suggests the relative importance of student tuition as a funding source compared to state-local appropriations. High ratios may reflect a large proportion of out-of-state students paying high non-resident tuition.

POTENTIAL TAX REVENUE PER STUDENT. These combined input factors establish a state's basic tax potential to finance public institutions relative to student enrollment load. Relatively stable tax potential to finance individual student's education without taking into account the types of institutions attended. Tax potential related to the state system's financial support requirements is reported as an index. Adjustment by the COG index establishes equivalent state purchasing power.

EDUCATION APPROPRIATIONS PER STUDENT. State and local tax revenue appropriated for current operating educational expenses of public institutions per annual FTE student. Indicates average state support to individual students without taking into account the types of institutions attended. Education approp's related to the state system's funding requirements are reported as an index (APP/SSI). Appropriations for research, agriculture, and medical are reported as a percent of total appropriations to suggest relative importance, and per capita as a need measure.

COLLECTIVE FINANCIAL ACTIONS. The combined actions are the factors that establish the degree to which the potential tax revenues per student are actually utilized to achieve the support level provided. States with a very high percentage are making a substantial combined tax effort, allocation to education, and tuition charge to finance public institutions.

ESTIMATED NET TUITION REVENUES PER STUDENT. Tuition revenues of public institutions per annual FTE student. Indicates average tuition (less state appropriated student aid) paid by all resident and non-resident students without recognizing the types of institutions attended. Tuition related to the state system's tuition funding requirements is reported as an index. Adjustment by the COG index establishes equivalent state purchasing power. Tuition revenues per student relative to disposable personal income per capita indicates tuition level relative to resident ability to pay.

Research Institutes, Centers and Public Service at UAF

The University of Alaska Fairbanks Special Mission states: "The University of Alaska Fairbanks is the State's center for organized activity in basic and applied research with particular emphasis on high latitude and Alaskan problems which have provided this University with a well-earned national and international reputation. Foci are directed toward marine science and high latitude studies in geophysics, biology, environmental sciences, and engineering disciplines. It will further conduct studies relative to the definition, exploration, and development of Alaska's natural resources, with a special emphasis on agriculture and minerals."

This mission statement, taken with UAF's actual research activities, define UAF as "the Arctic Institution for the United States" and "America's University of the North."

Within the areas of emphasis identified above, and in support of the overall academic program, UAF research institutes, centers, and laboratories have been organized under the Vice Chancellor for Research and Dean of the Graduate School to facilitate "the institution's two main responsibilities in promoting research: (1) to aid members of the faculty in developing and maintaining their research programs, and (2) to provide a central point of contact for off-campus agencies turning to the institution for research assistance," (NASC Accreditation Handbook, p. 73).

The Vice Chancellor directly administers several programs and facilities to promote research at UAF. Funding initiatives include the Faculty Small Grants Program and the National Institutes of Health-funded Biomedical Research Grants Program. Other initiatives are funded on a limited and discretionary basis to assist in the development of critical areas.

AGRICULTURAL AND FORESTRY EXPERIMENT STATION

Land Grant: The School of Agriculture and Land Resources Management and the Agricultural and Forestry Experiment Station continue the Land Grant tradition. Their research and public service activities emphasize practical applications and solutions to problems facing Alaskans and others in the circumpolar north.

Delta Research Site: One hundred miles southeast of Fairbanks, UAF researchers study carbon cycling in the Delta Agricultural Project, to gain insight into the effects of global warming. In basic agronomic research, UAF

Research Institutes, Centers and Public Service at UAF continued

scientists emphasize production techniques, and crop selection appropriate to high latitude lands in order to boost yield while protecting the soil and minimizing production costs.

Forest Soils Laboratory: Research conducted by the Laboratory emphasizes the soil fertility controls of forest development in interior Alaska forests. Facilities are available to students and collaborating investigators for conducting soil, plant tissue and water analysis for all major physical and chemical properties of these materials.

Fairbanks Research Center/Experimental Farm: For more than three-quarters of a century, interior Alaskan farmers have benefited from basic agricultural, and conservation studies conducted at the Fairbanks Experimental Farm. Today's researchers are investigating ways to increase yield while meeting Alaska's special environmental needs. Horticulture, small fruits, swine, and grain are some of the Center's major areas of study.

Palmer Research Center/Matanuska Farm: Located in the Matanuska Valley--Alaska's traditional agricultural center--the Palmer Research center concentrates its research efforts on developing new production techniques for the area's agricultural industry. Major research efforts in dairy, vegetable and beef production result in lower costs to Alaskan consumers and higher return for the state's producers. Studies are conducted at the University's Matanuska Farm, and on cooperating privately owned local farms.

Bonanza Creek Experimental Forest: The Taiga LTER (Long-Term Ecological Research program) site, located at Bonanza Creek, is part of a 19-site, National Science Foundation funded national network. It was established in 1987, four years after a major fire at Rosie Creek burned one-third of the experimental forest. At the Bonanza Creek site, UAF researchers, in cooperation with the Institute of Northern Forestry (U.S Forest Service) and scientists from other universities, focus their studies on the process that controls forest development on flood plains and uplands after fire.

ALASKA COOPERATIVE FISHERY AND WILDLIFE RESEARCH UNITS

These units are jointly sponsored by UAF, The Alaska Department of Fish and Game and the U.S. Fish and Wildlife Service. Research emphasis of the Fishery Unit is on the ecology and fisheries of aquatic ecosystems, alteration

Research Institutes, Centers and Public Service at UAF continued

and contamination of Alaskan freshwaters, and development of coldwater fishery techniques. The Wildlife Unit studies ungulate habitat relationships, waterfowl and seabird ecology, wildlife population dynamics, and the impact of northern development on wild animals and their habitats.

ALASKA NATIVE LANGUAGE CENTER

The Alaska Native Language Center was established by state legislation in 1972 to document, study and cultivate the twenty native Indian, Aleut and Eskimo languages of Alaska. It houses an archival collection of about 8,000 items, virtually everything written in or about Alaska Native Languages, including copies of most of the earliest linguistic documentation. The Center has published over 200 books and booklets for scientific, classroom and general use, including grammars, dictionaries, and folklore texts and audio tapes.

CENTER FOR CROSS-CULTURAL STUDIES

The Center for Cross-Cultural Studies is the research and development unit of the College of Rural Alaska and addresses the unique educational issues and problems inherent in Alaska's multicultural population. The Center administers instructional support contracts and grants for the College and issues publications and reports designed to improve cross-cultural understanding.

GEOPHYSICAL INSTITUTE

The Geophysical Institute is the only high-latitude research and academic center for geophysics in the United States focused on high-latitude geophysical phenomena. The scientific staff is organized under four research groups: Atmospheric Sciences, Space Physics and Aeronomy, Solid Earth Research, and Snow, Ice, and Permafrost. The Institute participates with other universities and agencies in many cooperative research programs. The following special facilities and projects are operated by the Institute.

Poker Flat Research Range is the largest land-based research rocket range worldwide and the only high-latitude range in the United States. Since it was established near Fairbanks in 1969 for auroral and middle-to-upper atmo

Research Institutes, Centers and Public Service at UAF continued

sphere research, approximately 234 large sounding rockets have been launched. A major federal project to upgrade launch and observatory facilities is now under way.

Optical Observatories: The Institute's main optical observatory is at Poker Flat Research Range and the Institute participates in an observatory at Svalbard, Norway. Observations using satellite communications are made from unmanned all-sky cameras located at remote sites in Alaska and Canada. Downrange observation sites for Poker Flat are at Fort Yukon, with sites planned at Arctic Village and Kaktovik; an optics lab supports these activities.

The Space Physics Analysis Center is equipped with hardware and software to acquire data and images of solar activity and related geophysical phenomena. The system displays the NOAA solar-geophysical data file on sunspots, solar flares, and the solar wind.

The High Frequency Active Auroral Research Program (HAARP) is a federal project for experiments to modulate the electric power in the earth's ionosphere. A powerful, high-frequency transmitter system is planned for a site north of Fairbanks to conduct and monitor experiments. HAARP is managed by the U.S. Air Force Geophysics Laboratory and the U.S. Navy Office of Naval Research. The Institute leads the Polar Radio-Science Consortium, a multi-agency scientific advisory group for HAARP.

Space Grant: NASA has designated UAF to participate in the National Space Grant program and will fund teaching and research in aeronautics, space, and related fields. The Institute has been funded to conduct the program, which will provide students internships in private industry and promote cooperative industry-university research.

The Alaska Volcano Observatory (AVO), a cooperative program with the Alaska Division of Geological and Geophysical Surveys and the U.S. Geological Survey, links laboratories in Alaska, Washington, and California by computer to monitor hazardous Alaskan volcanoes and conduct cooperative research. AVO also provides public safety information to the Federal Aviation Administration, NOAA, the Alaska Division of Emergency Services, municipal governments, and the public.

Seismic Information and Research: Monitoring earthquake activity and providing information to citizens and public officials, the Alaska Earthquake Information Center is a cooperative project with the USGS. The network of

Research Institutes, Centers and Public Service at UAF continued

120 seismic stations monitored by the Institute seismology laboratory includes stations of the Institute, the USGS and NOAA's Alaska Tsunami Warning Center. The office of the Alaska state seismologist is located at the laboratory, which also supports basic research on earthquakes and volcanoes.

Geological Research Support includes a geochronology lab equipped for argon-argon and potassium-argon dating of geologic samples. The paleomagnetism laboratory, used for research on Alaska's tectonic history and climate records of young sediments, is equipped with a 2-G superconducting magnetometer. A third laboratory is equipped for preparing samples for geochronologic, magnetic, and geochemical analysis.

The Tectonics and Sedimentation Group of the Institute and the UAF Geology Department conduct the Brooks Range Geologic Research Program, a major, long-term research effort to understand the geologic history of the northeastern Brooks Range and provide basic information for resource evaluation.

Snow, Ice, and Permafrost Laboratories: The Institute houses three ice laboratories and three cold rooms for permafrost studies, ice core analysis, glaciological research, and other research requiring simulated cold environments.

The Alaska Climate Research Center concentrates on research of Alaskan climatology and climatic trends and on answering requests for digitized climatic data, maintaining a relationship of mutual cooperation and support with the UAA Climate Center.

Atmospheric Sciences Laboratories: The Institute houses a physical chemistry and optics laboratory and operates an atmospheric chemistry laboratory in a nearby building. atmospheric chemistry measurements are routinely made from the Ester Dome Observatory near the Institute and at Poker Flat.

Remote Field Sites: Much seismology, magnetic, and auroral observing equipment is located at field sites throughout Alaska and northwestern Canada; most sites involve continuously operating, unmanned observing stations. the Alaska-Canada High Latitude Magnetic Chain of Stations is a series of magnetometers following a longitudinal line from Talkeetna, Alaska to Eureka, NWT, Canada. Information from the chain is transmitted via satellite to the World Data Center. A digital ionospheric sounding system at the Sheep Creek site is operated for the Air Force Air Weather Service.

The Alaska Synthetic Aperture Radar (SAR) Facility, funded by NASA, is designed to receive, process, and archive data from a new generation of

Research Institutes, Centers and Public Service at UAF continued

synthetic aperture radar satellites to be launched during the 1990s. Its major components are a receiving ground station, SAR processor system archive and operations system, a derived products system for nonroutine scientific analysis of SAR data.

Satellite Image Analysis Laboratories: In addition to the Alaska SAR Facility resources, the Institute houses the Alaska Data Visualization and Analysis Laboratory (ADVAL; more fully described under Center for Global Change and Arctic System Research, below). ADVAL provides analysis of satellite images in conjunction with other data sets.

The Geo-Data Center archives institute material, maintains various geophysical data collections to support research, and is the public browse facility for the Alaska High-Altitude Aerial Photography Program. Collections consist of various media, from 16mm educational movies to 8mm digital satellite imagery, from earth current chart data to positive CIR aerial transparencies. NOAA/AVHRR Satellite Imagery, Landsat Quick Look Satellite imagery are available and SPOT satellite images may be accessed through the Center.

The Computer Resources Center manages facilities capable of handling large-scale data analysis, satellite image processing, modeling of geophysical processes, and nonlinear plasma simulations.

The Geophysical Institute Library specializes in geophysics and includes numerous compact disk products to access holdings in other polar collections around the world.

Research Support: Services available include the machine shop which supports needs of the Institute and of the Polar Ice Coring Office at UAF; the electronics shop supports computing, electronics design and construction, and instrument calibration; and Photo-Graphics provides photographic, drafting, mapping, and computer graphics services.

CENTER FOR GLOBAL CHANGE AND ARCTIC SYSTEM RESEARCH

This campus-wide forum was initiated by the faculty in 1990 as a means for developing, coordinating, and implementing interdisciplinary research initiatives to link the many initiatives and resources addressing the role of the arctic in the Earth System at UAF. Its scientific focus is on understanding the chain of physical, geological, biological, and social processes of the arctic system that interact with the total Earth system and global change, in order to contrib-

Research Institutes, Centers and Public Service at UAF continued

ute to the scientific basis for predicting effects of environmental changes, and formulating policy options in response to the anticipated effects on humans and their support systems.

The Center is guided by a Board of Directors constituted of appropriate Deans and Institute Directors, and a Science Steering Committee of faculty from relevant disciplines which provide leadership to five working groups: Physical/Biological Interactions and Feedbacks; Arctic Paleoenvironments; Contribution of High Latitudes to the Global Carbon Budget; Terrestrial Ecosystem and Community Dynamics; and Social Aspects of Global Change in the Arctic.

The Alaska Data Visualization and Analysis Laboratory supports digital image processing and geographic information system analysis, especially as they relate to global change research. Its capabilities are relevant to such fields as remote sensing, environmental sciences, geology, geophysics, geography, glaciology, volcanology, land resources management, forestry, oceanography, and mineral exploration and engineering.

INSTITUTE OF ARCTIC BIOLOGY

The Institute of Arctic Biology is the principal research arm for life scientists in the College of Natural Sciences and is located in the Laurence Irving and the Arctic Health Research Buildings; it provides a vivarium, animal quarters, surgery and a variety of technical and instrument facilities and services. Areas of study include adaptations of plants, animals and humans to past and present climates of the Arctic, and well-developed programs in ecology, systematics, and molecular biology/biochemistry.

Ecology programs include research on taiga and tundra sites, including community organization, ecosystem structure and function, functional interactions and interdependencies of plants and animals and the way in which environmental and organismal processes modify nutrient cycling and decomposition within systems. These studies on ecosystem research are closely tied to physiological and biochemical processes of microorganisms, plants and animals, emphasizing coevolved responses (e.g. herbivory) which are supported through strong programs such as chemical ecology. Systematics of organisms within arctic and subarctic systems are being studied to establish mechanisms that provide for maintenance of heterogeneity in members of isolated communities.

Research Institutes, Centers and Public Service at UAF continued

Special Field Sites: The Experimental Biological Reserve is a 40 acre campus research area providing convenient access to local populations of biota for instruction and research. The Large Animal Research Station, adjacent to the campus, supports breeding colonies of muskox, caribou and reindeer for nutritional, metabolic, and breeding studies.

Research Field Camps at Eagle Summit (located on alpine tundra), at Cantwell, (near Denali National Park), and at Nome and Halibut Cove (on the shores of Kachemak Bay) provide a wide range of ecological diversity for research.

Toolik Lake Field Station: Toolik Lake is the only major ecological research station in the Arctic, being situated on tundra, north of the Brooks Range. It is funded by NSF, and serves as a second LTER (Long Term Ecological Research) site in Alaska, for Tundra ecosystems, in conjunction with the Taiga Site at Bonanza Creek (see above).

INSTITUTE OF MARINE SCIENCE

The Institute of Marine Science was established in 1960 and is the major research arm of the School of Fisheries and Ocean Sciences. Its major research foci include interdisciplinary studies of high latitude seas including the Bering and Chukchi seas and the seasonal sea ice zone; the ecology, biology, and physiology of high-latitude organisms, ranging from plankton to marine mammals; and interannual variation and physical oceanography in the Gulf of Alaska. Current research projects include: studies on water circulation in the Gulf of Alaska; upwelling of seawaters; carbon and nutrient cycles; environmental studies relating to the Exxon Valdez oil spill; seagrass ecology; marine mammals, shellfish and finfish biology, studies on sedimentation and origin of the continental shelf of Alaska.

Seward Marine Center: The Center supports the School's coastal and marine biological research, oceanographic research, and education by providing access to salt water laboratories and the coastal environment at the head of Resurrection Bay.

R/V *Alpha Helix*: The Seward Marine Center is home port for the R/V *Alpha Helix* a 133-ft ice-strengthened research vessel operated by the Institute of

Research Institutes, Centers and Public Service at UAF continued

Marine Science for the National Science Foundation. The vessel provides living quarters for fifteen scientists and a crew of nine. The vessel provides a research platform for a wide range of oceanographic studies at high latitudes.

Kasitsna Bay Laboratory: This field station supports teaching and research projects for the entire School. It is located eight miles from Seldovia on the south shore of Kachemak Bay. The facility includes a small laboratory, skiffs, and housing for 16; it allows opportunities for near-shore and benthic marine biology studies.

West Cost National Undersea Research Center: The Center was established in 1990 by an award from the National Oceanic and Atmospheric Administration's National Undersea Research Program. The Center will make available, on a competitive basis, marine research tools such as manned submersibles and remotely operated vehicles. The area served by the Center includes the entire West Coast of the United States, and Antarctica.

Flow Cytometry Facility: The development of high resolution flow cytometry at UAF has enabled rapid counting, measurement, sorting, and biochemical analysis of small microorganisms, such as aquatic bacteria. Certain types of study of marine bacteria, which represent a large proportion of the ocean biota, can now be studied more thoroughly, thanks to this advance. Analysis and sorting of other particles such as algae, spores, cell types such as blood cells, and blood parasites is possible.

JUNEAU CENTER FOR FISHERIES AND OCEAN SCIENCES: The Juneau Center for Fisheries and Ocean Sciences is located on Auke Bay near Juneau and, along with the next three units listed, is a major coastal element of the School of Fisheries and Ocean Sciences. Research at the Center includes genetic improvement of salmon broodstocks, aging and growth of larval fish, population dynamics, and management of marine fish and invertebrates. The Center operates the 42-ft R/V Maybeso in the inland waters of southeastern Alaska.

FISHERY INDUSTRIAL TECHNOLOGY CENTER: The Center, a research arm of the School of Fisheries and Ocean Sciences, was established in 1981, and is located in a new 20,000 sq. ft. facility in Kodiak. The Center's activities are divided into four major areas - harvesting technology, seafood processing technology, training, and support. Present research includes studies

Research Institutes, Centers and Public Service at UAF continued

of fish protein changes during the manufacture of surimi, the sources of microbial contamination in seafoods, and halibut and cod behavior during capture by trawl gear.

ALASKA MARINE ADVISORY PROGRAM: The prime focus of this program, operated by the School of Fisheries and Ocean Sciences, is technology transfer. Its faculty and staff are distributed throughout coastal communities of the State, where they assist residents in such activities as participating in new fisheries, marine safety, use of improved harvesting methods, aquaculture, use of improved handling and storage methods, and analysis of development opportunities in marine education and tourism.

ALASKA SEA GRANT COLLEGE PROGRAM: The Program was established in 1970 and earned Sea Grant College status for the University in 1980; it is administered by the School of Fisheries and Ocean Sciences. It promotes the wise use of marine and coastal resources through a coordinated program of research, education and advisory services, and its staff regularly participate in state and national discussions on fisheries management and development, marine mammal issues, and environmental issues which are important to the long-term viability of industries based on marine resources.

INSTITUTE OF NORTHERN ENGINEERING

Research is conducted in the program areas of civil, electrical, environmental, management, mechanical, and transportation engineering with a special focus on cold region problems as well as water-related problems in Alaska and other northern areas. Many of the active research programs also have a regional, national or international scope.

Water Research Center: The Water Research Center has major facilities to conduct studies in hydrology, water chemistry, microbiology, isotopic geochemistry, and oil spill and applied technology. Capabilities include state-of-the-art analyses of inorganic constituents in water, sediments, minerals, wastes, and living biological materials, and an excellent facility for determining the amount of stable isotopes naturally occurring in a variety of substances ranging from groundwater to whale baleen.

Research Institutes, Centers and Public Service at UAF continued

The Center is involved in Arctic coastal zone research in relation to oil development. For example researchers are documenting the numbers of bacteria and microorganisms in marine sediments impacted by the Exxon-Valdez oil spill. This will help provide evidence of hydrocarbon contamination and indicate the extent to which microbial degradation of some of the components of oil is occurring.

Environmental Technology Laboratory: The goals of the Environmental Technology Laboratory are to: 1) conduct research into issues relating to the management of the environment; 2) facilitate technology transfer on environmental issues as they relate to business and industry; 3) act as a networking center for information and expertise within the University to foster an interdisciplinary approach to environmental problems; 4) provide a center of expertise in Alaska on environmental and resource management issues; 5) facilitate access to and use of information and expertise by industry, business, and government in Alaska; and 6) provide funding for research and graduate studies and promote and enhance effective environmental education.

Engineering Research Center: Diverse research ranges from basic investigations of geomagnetically induced currents of power systems (in cooperation with the Geophysical Institute) to the design and testing of a solar assisted culvert-thawing system, so focusing on Alaskan and broader concerns.

Environmental Quality Engineering and Science Program: Research on pollution control technologies, the impacts of industrial activity and alternatives for sound environmental management are grouped in this program. Current research examines the impact of herbicide application along the Alaska Railroad right-of-way, effects of discharge to the Chena River, the removal of suspended solids from seafood processing wastewaters, ways to attain suitable water supplies for salmon hatcheries, and development of a hazardous substance management plan for the Alaska Department of Transportation.

Transportation Research Center: This Center and its associated Transportation Technology Transfer Program are active in addressing the transportation technology needs of Alaska, the north, and the nation. Transport systems over permafrost are one example of significance to vast areas of Alaska.

Research Institutes, Centers and Public Service at UAF continued

MINERAL INDUSTRY RESEARCH LABORATORY

This laboratory was created by the Alaska Legislature in 1963, with a mandate to conduct basic and applied research on problems of the mineral industries and to cooperate with the State and Federal government agencies. It conducts applied and basic research in areas such as coal preparation, coal science, mineral beneficiation, mine and mill design, new resource development, and improved exploration and prospecting methods.

PETROLEUM DEVELOPMENT LABORATORY

The primary function of this laboratory is to explore various aspects of enhanced oil recovery research, including the production of heavy oil through thermal recovery and miscible oil displacement. The goal is to transfer the information from the laboratory and field experiments to engineers who can apply it to problems in the oil fields.

UNIVERSITY OF ALASKA MUSEUM

The main research objectives of the Museum are to acquire and develop systematic research collections resulting from or forming the basis of object- or organism-based research on Alaska, the Arctic, and Subarctic, and to conduct collection-based research in the Cultural, Earth, and the Life Sciences.

Northern Center for Systematics and Biodiversity: This Center meets the need for primary specimen-based information. One primary function of this center is the development of electronic databases of the flora and fauna of the State of Alaska: the Northern Plant Documentation Center is an example.

The Alaska Quaternary center: This Center, established in 1983, serves as the focus for interdisciplinary research in Quaternary Studies. This consortium of Quaternary scientists includes terrestrial and marine geology, paleolimnology, geography, climatology, tephrochronology, plant and animal ecology, palynology, vertebrate paleoecology, micropaleontolgy, ethnology, archaeology and human ecology.

Tephrochronology Center: The delineation of a widespread Holocene volcanic ash (tephra) sequence in southern interior Alaska led to the formation of the Museum's Tephrochronology Center, which helps date prehistoric cultural development and geological events.

Research Institutes, Centers and Public Service at UAF continued

INTERDISCPLINARY RESEARCH PROGRAMS

ATMOSPHERIC CHEMISTRY

Atmospheric Chemistry, administered by the Department of Chemistry, seeks to understand the complex changes in the atmosphere resulting from natural and human influences.

BIOCHEMISTRY AND MOLECULAR BIOLOGY

This interdisciplinary program is administered by the Department of Chemistry. Its research deals with molecular approaches to biological phenomena, exemplified by studies of evolutionary relatedness of Alaskan polar bears by analysis of mitochondrial DNA, molecular mechanisms of gene control in soil bacteria, the structure and function of light harvesting proteins in marine algae, and the possible role of aluminum in deposition of Alzheimer's-related proteins in the brain.

ENVIRONMENTAL SCIENCES

Graduate research in Environmental Sciences may be pursued through several departments and may emphasize studies in Natural Resources Management, Environmental Quality Engineering or Science, Marine Biology, Wildlife Management and other areas.

NORTHERN STUDIES

Studies of northern policy issues and the cultural, historical, economic and political contexts of the circumpolar north can be undertaken through departments of the College of Liberal Arts, including anthropology, economics, geography, history, political science and psychology.

Research Institutes, Centers and Public Service at UAF continued

RESEARCH SUPPORT

ELECTRON MICROSCOPE LABORATORY: Transmission and scanning electron microscopes, specimen preparation and photographic equipment are managed by a users committee and professional staff to support research in a variety of areas including arctic biology and human health.

ELMER E. RASMUSON LIBRARY/MEDIA CENTER:

The library has over one million bibliographic items in a variety of print and audiovisual media. It participates in the Western Library Network, and other services, providing electronic access to over 12 million works nationwide.

The Geophysical Institute Library specializes in geophysics and includes numerous compact disk products to access holdings in other polar collections around the world.

The Bio-Medical Library, housed in the Arctic Health Building, specializes in periodicals in the health and life sciences, especially as they relate to cold regions research.

The Alaska and Polar Regions Collections include the world-class Alaska Collection, the University Archives and Manuscripts collection, historical photographs, rare books and maps, and the oral history materials.

MICROBEAM ELEMENTAL ANALYSIS FACILITY

UAF, through the Department of Geology and Geophysics, maintains a Cameca SX-50 electron microprobe, a state-of-the-art instrument capable of determining elemental abundances (all elements heavier than Be) in areas as small as 1 micron in diameter. The SX-50 has secondary, backscattered, and absorbed electron detectors for sample imaging. These, in combination with the rapid qualitative X-ray analysis offered by the SX-50's Kevex energy dispersive X-ray spectrometer, make the SX-50 a powerful tool for determining mineralogical and metallurgical phases. The system can map elemental distributions in small areas.

Research Institutes, Centers and Public Service at UAF continued

OFFICE OF SPONSORED PROGRAMS

The Office of Sponsored Programs (OSP) supports the Vice Chancellor for Research and Dean of the Graduate School by performing a threefold mission. Primarily, it is responsible for researching funding opportunities to match interests at UAF, and to assist faculty and professionals in meeting their funding goals for research, scholarly activities, education, and service. Secondly, OSP assists with the preparation and submittal of funding proposals, and seeks to ensure that proposals meet University, State, Federal and funding agency requirements. Finally, OSP provides reports and analyses to the University administration on trends and projections of proposals and funding activities that are important for accountability and planning purposes.

POLAR ICE CORING OFFICE

UAF hosts this international, National Science Foundation-funded program to extract polar ice cores up to 3,000 meters deep for a variety of research studies conducted by UAF and other NSF grantees. The program draws upon, and enlarges, UAF's arctic experience, especially in engineering, and polar research. Ice sheets contain prehistoric records of annual precipitation, atmospheric temperature and composition, solar activity and volcanic eruptions; ice core samples therefore provide a detailed, historical database of climatological data since the last interglacial period which will be of inestimable value as we analyze apparent global warming trends. PICO provides logistical and technical support in other aspects of NSF-sponsored research in remote glaciate regions of the world.

UNIVERSITY OF ALASKA PRESS

The Press publishes scholarly non fiction works concerning Alaska, the North Pacific Rim and the circumpolar north. The Press has three continuing series--the Rasmuson Library Historical Translations, the Oral Biographies, and the Classic Reprints. It also assists in distributing publications and videos produced by other small publishers and university departments. Since 1985, the number of new titles per year has grown from two to eight, with a total of 42 titles currently in print.

Research Institutes, Centers and Public Service at UAF continued

COOPERATIVE EXTENSION SERVICE

Cooperative Extension Service(CES) represents a unique entity within the University of Alaska system. It is part of a nationwide informal education system which functions in a cooperative relationship between the federal government through the United States Department of Agriculture and the various states through land-grant colleges and universities. The legal status of CES is proved through the federal Smith-Lever Act, Alaska State statutes and Memorandum of Agreement between USDA and the University of Alaska.

The Mission of CES is to interpret and extend relevant and current knowledge in agriculture and natural resources, community development, home economics and 4-H youth development to adults, youth, families and community leaders in an understandable and usable form, and to encourage the application of this knowledge to solve problems and challenges that face the people.

Major Program Areas: Agriculture and Natural Resources, Community Resource Development, Home Economics, and 4-H and Youth Development are briefly described as follows:

Agriculture and Natural Resources focuses on educational programs covering production agriculture, livestock, agronomy and commercial horticulture, forestry and natural resource management.

Community Resource Development is an extension education program intended to assist communities in the facilitation of local organizational processes and community decision making.

Home Economics is an educational program designed to address the family and home environment: Program areas include: Food safety, textile and clothing, diet and nutrition, and early childhood development. Another part of the Home Economics program includes Housing and Energy, Family Resource Management, and the federally funded Expanded Food and Nutrition Education Program (EFNEP). This program assists low-income families and youth.

4-H - Youth Development is an educational program of the University of Alaska and the Land Grant System in cooperation with USDA. Youth and adults learn vocational skills, leadership, personal development and life skills, and engage in community service.

Installation Technical Information

Hardware

- 1 HP3000 Series 950 Central Processing Unit
- 2 HP7980 Tape Drives
- 17 HP7937 Disk Drives
- 1 HP2564 Line Printer
- 50 Staff Terminals
- 28 Public Terminals
- 22 Optical Input Devices

Software

- VTLS89
  (VTLS Inc. Virginia Tech Library Systems)
- HP Desk, HP Toolset, Adager, SCompare, HP A11base, HP Laser RX, HP Laser ROM

NOTE: Geographically, UA's installation is the largest VTLS installation in the world.

Notes: Programs in Ketchikan and Sitka were not active during FY90 due to sabbatical/vacancy.
(1) The number of people times the hours spent with those people (3 persons for 2 hours = 3X2=6 contact hours).
(2) One hour to several days intensive group learning session on a specific topic.
(3) Staff whose work is carried out under the supervision of a professional, either an agent or a specialist.

	TOTAL Non-Campus			(91 Buildings)	276,038	$20,113,178	$34,083,556	$123.47

NOTES: (1) Year Acquired - the year the structure was first physically occupied.
(2) GSF - Gross Square Feet.
(3) Current Plant Investment - the estimated funds required to recreate the entire facility in its current configuration in current dollars.
(4) Excluded from this report are leased facilities and certain remote research facilities, such as those at Toolik Lake, which are sited on non-University owned land and which operate by virtue of annual renewals of use permits granted by the State.
